

Get care when you need it, where you need it

When you're sick or hurt, you want to get the right care at the right time. **You should always call 911 or go to your nearest emergency room if you have a life-threatening emergency.** But you can save time and stress by knowing what kind of care you should get and where.

Primary care: Unless your life is in danger, call your primary care provider (PCP) first. They know your health history and what treatments will work best for you. You can visit your PCP for anything from a sore throat to cancer screenings. If your PCP can't provide the care you need, they will help you find someone who can.

Behavioral health care: Behavioral health care includes services for mental health care and drug and alcohol use disorders. Your primary care doctor can help you find a behavioral health provider if you don't have one.

Urgent care: Go to urgent care if you have a non-life-threatening condition, your PCP is not available or you cannot wait for an appointment. Consider going to urgent care if you have¹:

- Mild asthma symptoms
- Mild abdominal pain
- Sprains or strains
- Fever

Dental care: Dentists are prepared to help you with your dental needs. Unless you have a life-threatening emergency, call your dentist for any issues related to oral health.

Emergency care: Examples of emergency care conditions¹:

- Chest pain
- Difficulty breathing
- Head injuries
- Bleeding that won't stop

Other languages and formats: You can get this document in other languages, large print, Braille or a format you prefer. You can also ask for an interpreter. This help is free. Call 888-788-9821 (TTY/TDD users, please call 711). We accept relay calls.
